## Who are the RoboBlazers?

Team 7617. RoboBlazers. University High School's FRC team. All one in the same. The RoboBlazers are an FRC robotics team that was founded in 2019. They are a student-driven team consisting of about 25-30 students that are supported by adult mentors.

## What Is the FIRST Robotics Competition (FRC)?

Under strict rules, including limited time and resources, teams of students are challenged to raise funds, design a team "brand," hone teamwork skills, and build and program industrial-size robots to play a difficult field game against like-minded competitors. It's as close to real-world engineering as a student can get. In just six weeks, student teams analyze the game, design and build the robot, program the robot, decide on tournament strategy, market the team, and more.

## How Can I Help the RoboBlazers?

FRC is an incredible opportunity for high school students to gain experience in STEM fields, but our team needs your help to do so. The RoboBlazers are completely funded by fundraising efforts to allow students from all backgrounds to join the team without a participation fee. All donations are eligible for tax-deductions.
